Synthetic Tractor Hydraulic/Transmission Oil (ATH)

SAE 5W-30

Formulated for "All Weather" Performance in Farm and Commercial Equipment

PRODUCT DESCRIPTION

AMSOIL Synthetic Tractor Hydraulic/Transmission Oil is an "all weather" Universal Tractor Transmission Oil (UTTO) engineered to meet the tough demands of heavy-duty, hydraulic-powered farm and commercial equipment. Its unique formulation of synthetic base stocks and additives effectively reduces wear, resists heat, protects against rust and extends fluid and equipment service life. Synthetic Tractor Hydraulic/Transmission Oil is recommended for extended oil drains based on oil analysis.

Excellent Protection in Temperature Extremes

AMSOIL Synthetic Tractor Hydraulic/Transmission Oil operates over a wide range of temperatures. It has a high viscosity index to maintain its lubricity at high operating temperatures, and it flows at temperatures as low as -47°F (-44°C) for improved equipment operation and wear protection at low temperatures. Synthetic Tractor Hydraulic/Transmission Oil exceeds the most demanding "all weather" specifications of both Ford New Holland FNHA-2-C-200 & 2-C-201 and John Deere J20C & J20D, eliminating the need for seasonal oil changes.

Smooth Brake Operation

AMSOIL Synthetic Tractor Hydraulic/Transmission Oil is formulated with durable friction modifier additives that effectively suppress wet brake chatter. Unlike conventional oils that can break down and cause vibration, AMSOIL Synthetic Tractor Hydraulic/Transmission Oil provides continuous frictional stability for long-term smooth brake operation.

Feature: Multi-Viscosity

Benefits: Excellent cold and hot weather protection, no seasonal change outs

Feature: Universal Applications

Benefits: Inventory consolidation, no mis-applications

Feature: Stable Friction Modifier Additives

Benefits: Correct and decisive multi-disc/clutch operation, excellent control over brake chatter, smooth operation, extended oil and equipment life

Feature: Anti-Foam Additives

Benefits: Rapid air release, cooler operation, smooth brake operation, control over fade and spongy hydraulic response

Feature: Oxidation Inhibitors

Benefits: Excellent resistance to oil degradation at high temperatures, extended lubricant and equipment life

Feature: Seal and Hose Conditioners

Benefits: Compatible with all seal materials, seal and hose flexibility, positive seal seating, reduced oil leaking, extended seal and hose life, fewer blown hoses

Feature: Superior Anti-Wear Additives

Benefits: Scoring and gear wear protection under all load conditions, extended equipment life even in severe conditions, increased pump and valve life, may be used in final drives calling for a UTTO
